Data in many forms...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer printouts, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to obtain more information

Inquiries about this publication and related statistics or services should be directed to the Statistics Canada reference centre in:

| | | | |
|------------|----------|-----------|----------|
| St. John's | 772-4073 | Winnipeg | 949-4020 |
| Halifax | 426-5331 | Regina | 359-5405 |
| Montréal | 283-5725 | Edmonton | 420-3027 |
| Ottawa | 992-4734 | Vancouver | 666-3691 |
| Toronto | 966-6586 | | |

Toll-free access is provided in all provinces and territories, for users who reside outside the local dialing area of any of the regional reference centres:

| | |
|---------------------------------------------------------|----------------------|
| Newfoundland & Labrador | Zenith 07037 |
| Nova Scotia, New Brunswick & Prince Edward Island | 1-800-565-7192 |
| Québec | 1-800-361-2831 |
| Ontario | 1-800-268-1151 |
| Manitoba | 1-800-282-8006 |
| Saskatchewan | 1 (112)-800-667-3524 |
| Alberta | 1-800-222-6400 |
| British Columbia (South & Central) | 112-800-663-1551 |
| Yukon & Northern B.C. (area served by NorthwesTel Inc.) | Zenith 08913 |
| Northwest Territories | Zenith 22015 |

How to order publications

This and other Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the local Statistics Canada offices, or by mail order to Publication Sales and Services, Statistics Canada, Ottawa, Ontario, K1A 0V7.

Des données sous plusieurs formes...

Statistique Canada diffuse des données sous diverses formes. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms, et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingué et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toute demande de renseignements au sujet de cette publication ou de statistiques et services connexes doit être adressée aux centres de référence de Statistique Canada à:

| | | | |
|------------|----------|-----------|----------|
| St. John's | 772-4073 | Winnipeg | 949-4020 |
| Halifax | 426-5331 | Regina | 359-5405 |
| Montréal | 283-5725 | Edmonton | 420-3027 |
| Ottawa | 992-4734 | Vancouver | 666-3691 |
| Toronto | 966-6586 | | |

Un service d'appel sans frais est offert, dans toutes les provinces et dans les territoires, aux utilisateurs qui habitent à l'extérieur des zones de communication locale des centres de référence régionaux:

| | |
|-------------------------------------------------------------------------------------|----------------------|
| Terre-Neuve et Labrador | Zénith 07037 |
| Nouvelle-Écosse, Nouveau-Brunswick et île-du-Prince-Édouard | 1-800-565-7192 |
| Québec | 1-800-361-2831 |
| Ontario | 1-800-268-1151 |
| Manitoba | 1-800-282-8006 |
| Saskatchewan | 1 (112)-800-667-3524 |
| Alberta | 1-800-222-6400 |
| Colombie-Britannique (région sud et centrale) | 112-800-663-1551 |
| Yukon et le nord de la Colombie-Britannique (région desservie par NorthwesTel Inc.) | Zénith 08913 |
| Territoires du Nord-Ouest | Zénith 22015 |

Comment commander les publications

On peut se procurer cette publication et les autres publications de Statistique Canada auprès des agents autorisés et des autres librairies locales, par l'entremise des bureaux régionaux de Statistique Canada, ou en écrivant à Ventes et distribution de publications, Statistique Canada, Ottawa, (Ontario), K1A 0V7.

HORTICULTURAL CROPS

This report presents the areas and farms reporting horticultural crops for harvest from the 1981 Census of Agriculture. Table 8 shows the comparison of 1981 data to previous censuses at the provincial level. Tables 17 and 18 show the geographical breakdown of areas and farms reporting by province, agricultural region and census division for horticultural crops in 1981. An outline map of the census division boundaries is also included.

Census Farm

A census farm is defined in the 1981 Census of Agriculture as a farm, ranch or other agricultural holding with sales of agricultural products during the past 12 months of \$250 or more. This definition differs from previous censuses in that the requirement for one acre or more of land has been dropped and the sales limit has been changed from \$50. Where comparisons between 1981 data and previous censuses are shown, the \$50 definition is used to derive the historical data in all cases. Also included in census farms were farms that had not met the \$250 sales limit in the previous 12 months, but anticipated sales of \$250 or more in 1981.

Horticultural Crops

The census farm operator was to report the total area of each horticultural crop seeded or to be seeded for harvest in 1981 even if they were sown or planted in an earlier year. Tree fruits were to be reported if there were 25 or more fruit trees on the holding. Small fruits, grapes, vegetables, nursery products, greenhouse products and mushrooms were to be reported only if they were grown for sale. Actual harvested areas may vary from the census report because of changes in planting intentions or crop failure after the date of enumeration. The date of enumeration was to be taken as June 3, 1981.

Included as horticultural crops are the following: tree fruits (apple, pear, plum and prune, sweet cherry, sour cherry, peach and apricot), small fruits and grapes (strawberries, grapes and other small fruits), vegetables (asparagus, beans, beets, broccoli, cabbage, carrots, cauliflower, cucumbers, green peas, lettuce, onions, rutabagas (turnips), sweet corn, tomatoes and other vegetables), nursery products, greenhouses and mushroom houses. The area of horticultural crops reported for provinces,

HORTICULTURE

Ce bulletin présente les superficies et les fermes déclarant de l'horticulture pour la récolte selon le recensement de l'agriculture de 1981. Le tableau 8 fait la comparaison des données de 1981 avec celles des recensements antérieurs au niveau des provinces. Les tableaux 17 et 18 présentent la répartition géographique des superficies et des fermes déclarantes par province, région agricole et division de recensement pour l'horticulture en 1981. Une carte-index des limites de division de recensement est annexée.

Ferme de recensement

Une ferme de recensement est définie au recensement de l'agriculture de 1981 comme une ferme, un ranch ou une autre exploitation agricole dont les ventes de produits agricoles au cours des 12 derniers mois se sont élevées à \$250 ou plus. Cette définition diffère sur deux points de celle employée aux recensements antérieurs: d'abord, le critère prévoyant une superficie de base d'une acre ou plus a été abandonné, puis le seuil des ventes fixé à \$50 a été modifié. Lorsqu'on présente des comparaisons entre les données du recensement de 1981 et celles des recensements antérieurs, le seuil de \$50 est toujours utilisé pour extraire les données historiques. Les fermes de recensement incluaient aussi les exploitations n'ayant pas atteint le seuil de ventes de \$250 au cours des 12 derniers mois, mais qui prévoyaient des ventes de \$250 ou plus en 1981.

Horticulture

L'exploitant agricole devait déclarer la superficie totale de chaque culture ensemencée ou à être ensemencée pour la récolte en 1981 même si elles avaient été ensemencées ou plantées au cours d'une année précédente. Les fruits de verger étaient déclarés seulement quand il y avait au moins 25 arbres fruitiers dans l'exploitation. Les petits fruits, le raisin, les légumes, les produits de pépinière, de serres et de champignonnières n'étaient déclarés que lorsqu'ils étaient cultivés pour la vente. Les superficies effectivement récoltées peuvent différer de celles qui ont été déclarées au recensement par suite de changements dans la superficie de culture projetée ou de récoltes manquées qui se sont produites après la date du recensement. La date du recensement devait être celle du 3 juin 1981.

L'horticulture comprend les cultures suivantes: les fruits de vergers (pommes, poires, prunes, cerises douces, cerises aigres, pêches et abricots), les petits fruits et le raisin (fraises, raisins et autres petits fruits), les légumes (asperges, haricots jaunes ou verts, betteraves, brocoli, choux, carottes, choux-fleurs, concombres, pois verts, laitue, oignons, rutabagas (navets), maïs sucré, tomates et autres légumes), les produits de pépinières, de serres et de champignonnières. La superficie horticole déclarée par province, région agricole ou division de

agricultural regions or census divisions represents the area operated by farmers whose headquarters are located in that geographical unit. Any part of that farm's horticultural crops located outside the unit will be included and the reported area will be different from the actual area within the boundaries of the unit.

Winter kill in 1981 destroyed a significant number of fruit trees, especially apple trees, in Eastern Canada. Quebec was particularly hard hit. On Census Day, the extent of damage was still undetermined and consequently the number of trees producers reported does not fully reflect the number of trees destroyed. Although farmers were asked to report the area they anticipated harvesting in 1981 for grapes, strawberries, raspberries and asparagus, in some instances they reported the area planted.

Conversion of "Imperial" to "Metric"

This report presents area data in metric (hectares) as well as imperial (acres) units. This conversion from acres to hectares was made by Statistics Canada using the factor 0.404 685 6 hectare equals one acre. Where areas are reported in square feet, the metric equivalent used is square metres. The conversion factor is 0.092 903 04 square metre equals one square foot. Data expressed in metric units may not add exactly due to rounding.

Conversion of Arpents to Acres

In the province of Quebec, some respondents reported land areas in arpents. The conversion to acres was made by Statistics Canada using the factor 1,000 arpents equal 845 acres.

Availability of Additional Information

The data presented in this bulletin represents only the most frequently requested tabulations. Data for small geographical areas are available on request as photocopies of computer printout, on microfiche or magnetic tape. Specific requests for data not already tabulated may also be serviced. Details of the methodologies for the processing of the data are not described in the text but may be of interest to selected users. Further information may be obtained by contacting: Agriculture Division, Census of Agriculture Section, User Services Unit, Statistics Canada, Ottawa K1A 0T6, (613) 995-4936.

recensement représente la superficie des terres exploitées par les exploitants agricoles dont le siège est situé dans l'unité géographique spécifiée. Toute partie de cette ferme en horticulture située en dehors de cette unité sera déclarée comme se trouvant à l'intérieur de celle-ci, et la superficie déclarée sera différente de la superficie réelle des terres agricoles situées dans cette unité.

En 1981, le gel a détruit un grand nombre d'arbres fruitiers, plus particulièrement les pommiers, dans l'est du Canada. Le Québec a été très touché. Le jour du recensement on n'avait pas encore précisé l'étendue des dégâts ce qui fait que le nombre d'arbres déclarés par les exploitants ne tient pas entièrement compte du nombre d'arbres détruits. Bien que l'on ait demandé aux agriculteurs d'indiquer la superficie qu'ils comptaient récolter en 1981 en raisins, fraises, framboises et asperges, certains ont déclaré la superficie plantée.

Conversion d' "impérial" à "métrique"

Ce bulletin présente les données de superficie en unités métriques (hectares) ainsi qu'en unités impériales (acres). La conversion d'acres en hectares a été faite à Statistique Canada en employant le facteur 0.404 685 6 hectare égale une acre. Quand les superficies sont déclarées en pieds carrés, l'équivalent métrique employé est le mètre carré. Le facteur de conversion est 0.092 903 04 mètre carré égale un pied carré. Certains chiffres métriques ayant été arrondis, leur somme peut ne pas correspondre exactement aux totaux indiqués.

Conversion des arpents en acres

Dans la province de Québec, certains recensés ont exprimé l'étendue des superficies en "arpents". La conversion en acres a été faite à Statistique Canada en utilisant le facteur suivant: 1,000 arpents égalent 845 acres.

Disponibilité des données supplémentaires

Les données de ce bulletin représentent seulement les totalisations le plus souvent demandées. Les utilisateurs peuvent obtenir sur demande des données pour de petites régions géographiques sous la forme de photocopies d'imprimés d'ordinateur, sur microfiches ou sur bandes magnétiques. Nous pouvons aussi donner suite aux demandes de données qui ne sont pas déjà totalisées. Le détail des méthodes du traitement des données n'est pas décrit dans le texte mais il peut être d'intérêt à certains utilisateurs. Pour de plus amples renseignements, prière de s'adresser à la Division de l'agriculture, Section du recensement de l'agriculture, Sous-section des services aux utilisateurs, Statistique Canada, Ottawa K1A 0T6, (613) 995-4936.

Confidentiality

All data released by the Census of Agriculture are subject to the confidentiality restrictions of Statistics Canada. To prevent disclosure of confidential material, data for areas of less than 10 farms will not be published separately, but merged with a geographically adjacent area. Also, certain data have been suppressed to prevent disclosure of operations of an identifiable individual agricultural holding. In such cases, the relevant data cell will be replaced with an "x".

Confidentialité

Toutes les données du recensement de l'agriculture sont soumises aux restrictions qu'impose Statistique Canada pour protéger leur caractère confidentiel. Par conséquent, pour empêcher la divulgation de renseignements secrets, les données pour les régions comptant moins de 10 exploitations agricoles ne seront généralement pas publiées mais seront incorporées à celles d'une région voisine. De même, certaines données ont été supprimées de façon à éviter la divulgation des opérations d'une exploitation agricole identifiable. Pour ces cas particuliers, les données pertinentes seront remplacées par un "x" dans les tableaux.

SYMBOLS

- nil or zero.
- less than one unit.
- .. not available.
- x confidential to meet secrecy requirements of the Statistics Act.

SIGNES CONVENTIONNELS

- néant ou zéro.
- moins d'une unité.
- .. non disponible.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.
